## DIALOG SERVICES

Architecture Interior Design The Vancouver Public Library, the City of Vancouver, and YWCA Metro Vancouver worked with DIALOG to provide an inclusive gathering space and affordable housing for single mothers and their children in an integrated effort to find a unique solution and enhance Vancouver's Downtown East Side with civic services. This project pairs a public library with affordable housing. It is named nə´c'a?mat ct (Musqeum for 'We Are One'), and is the first building in Vancouver named in a Coast Salish language. Its novel progamme strengthens the neighbourhood's social fabric by providing safe amenities.
